SUNSTONE

11. Food Delivery Website and Application

Food Delivery Website and Application

- A food delivery website or application is slightly different from grocery delivery. However, it also works on the same grounds as the latter and may require full-stack development. You can practice and improve your front-and back-end development skills when making food delivery websites or applications.

Task 1 :: SDP (Module 1)

Creation of SRS & Github

- Create SRS : Railway Reservation & Library Management System

- Creation & Set-up of Github account

- Creation & Hands-on to various commands of Git Bash

Evaluation Metric:

100% Completion of the above tasks

Learning outcome

- Get to know about different lifecycle models.

- Understanding importance and how to create an SRS

- Knowing various commands of Github

- Understanding agile and scrum management techniques for efficient product development
